

CASE STUDY

INVENTORY PAIN POINTS

PROBLEM:

We came across a manufacturing company with the following operational bottlenecks:

- Unnecessarily High Inventory Costs
- Fluctuated Demand-Drive Uncertainty
- Inventory Turnover Rates
- Unwanted Order Duplications
- More Working Capital Engaged
- Excessive Storage Price

SOLUTION BY inoday:

Considering the above-mentioned pain points and operational bottlenecks, our experts at NetSuite ERP Solutions comprehended the way business was being handled and leveraged core capabilities of extensively engineered NetSuite Inventory Management to ensure eliminated redundancies, optimized cash flow, and streamlined inventory operations.

Key improvements include:

- Automated calculation of key settings
- Categorization of products based on volumes
- Inventory tracking in cycle counts
- Complete Traceability
- Increased inventory accuracy
